Courage and optimism

Part of the Häfele DNA for 100 years

THE GLOBAL COMPANY WITH A FAMILY TOUCH.

From the beginning, company founder Adolf Häfele regularly visited his partners on-site, believing in the power of personal contact. One hundred years later, we're still convinced. By being close to our customers, we better understand their needs, analyze market conditions more precisely and more quickly identify opportunities to improve.

Häfele has become synonymous with pioneering ideas for living, working and leisure. The company's hardware technology credentials in the fields of furniture construction, office organization, electronic access control and architectural hardware solutions are unparalleled.

In addition to being a global manufacturer, we also source products from around the world to bring the Canadian market the most current and innovative products and design ideas. Partnering with highly regarded European suppliers, guarantees quality products in every Canadian home.

We offer a complete one-stop service, comprehensive advice, sound development competence, and sophisticated logistics - all ideal characteristics for partnership in the furniture industry, building and design trades.

At Häfele, knowledge gained through connection with our customers has always been coupled with a wealth of ideas, courage and the drive to always stay one step ahead. To date, this approach has resulted in new products, efficient processes and innovative services and solutions. We thank you, our customers, for being our partners in this journey to maximize the value of space.

Create a space that will work for today, tomorrow and in the future.

Kitchen planning should start with the homeowners preferences and how they want to make the best use of their space. This has a big impact on planning decisions. Things like whether a dining area will be included for entertaining, or a space that can be doubled as a home office should be taken into consideration.

Is the kitchen open concept? Does it open to other areas of the home? What will the view from other rooms look like? Is additional counter space required for kitchen tools or does the homeowner prefer to have them stored away? Document these key considerations and provide expertise to your client to create a customized kitchen design that perfectly aligns with their needs and preferences.

VAUTH-SAGEL BY HÄFELE

Häfele is the exclusive distributor of Vauth-Sagel; a family-owned business that was established in 1962 by Hermann Vauth and Heinrich Sagel. Vauth-Sagel develops and manufacture premium German quality kitchen accessories, and individual solutions or modular system solutions that make
people's everyday lives easier.

Vauth-Sagel focuses on combining design and functionality. Their stylish pull-out systems are not only beautiful to look at; they also offer high-quality convenience and help to make everyday life in the kitchen easier. This has been honoured numerous times and they are proud to have received several renowned design awards with our products.

VERSATILE AND FLEXIBLE

Shape and material are often a matter of taste when choosing a design. For this reason, the entire Vauth-Sagel program is designed as a modular system in which the guide and the frame can be combined with all storage designs.

CORNER SOLUTIONS

01

MAXIMIZING CORNER STORAGE

German-made Vauth-Sagel offers a range of corner solutions designed to maximize storage and accessibility in the kitchen.

Some benefits include integrated soft and self-closing, height-adjustable trays, power-assisted movement, and comfortable access. There are multiple colour options to match the kitchen's aesthetics, including the newly released "Planero Walnut" style.

VS COR® Fold
Vauth-Sagel by Häfele

> The VS COR® Fold corner cabinet is easily accessible due to its user-friendly movement when opened
> Upon opening, the front baskets automatically swing away, leaving free access to the back basket
> Thanks to the front connection with integrated 3D adjustment and central height alignment, the VS COR® Fold can be fitted perfectly
> The integrated dampening ensures quiet, smooth closing of the pull-out

DRAWER ORGANIZATION

05

MAXIMIZING DRAWER ORGANIZATION

Drawer organization is a crucial aspect of a kitchen design to ensure efficient use of space.

Matrix Box Slim A, Vionaro, and a range of Fineline products maximize drawer space and minimize clutter.

Matrix Box A

KITCHEN ACCESSORIES

06

MAXIMIZING KITCHEN FUNCTIONALITY

When utilized properly, kitchen accessories can maximize storage space and keep the kitchen organized and efficient.

The new pull-out spice racks come in various sizes and maximize storage space. Appliance lifts and pull-out tables help keep the kitchen organized and efficient. The Hailo step stool comes in handy when the top of the cabinet needs to be reached.

Kitchen Accessories
Pull-Out Spice Racks

BACKSPLASH SOLUTIONS

MAXIMIZING BACKSPLASHES

AluSplash® by Häfele is an innovative backsplash solution known for its sleek and modern design.

Featuring lightweight, aluminum-based panels in a range of matte and high-gloss finishes catering to different aesthetics, AluSplash® is eco-friendly, easy to clean, and fire-resistant, ensuring safety and sustainability in the kitchen.

AluSplash® by Häfele

AluSplash® by Hafele is a versatile choice for those looking for an affordable yet durable kitchen backsplash system. It's perfectly smooth surface, high-gloss or matte finish options and vibrant colour range will make any kitchen stand out from the rest!

Place your order at **www.hafele.ca**
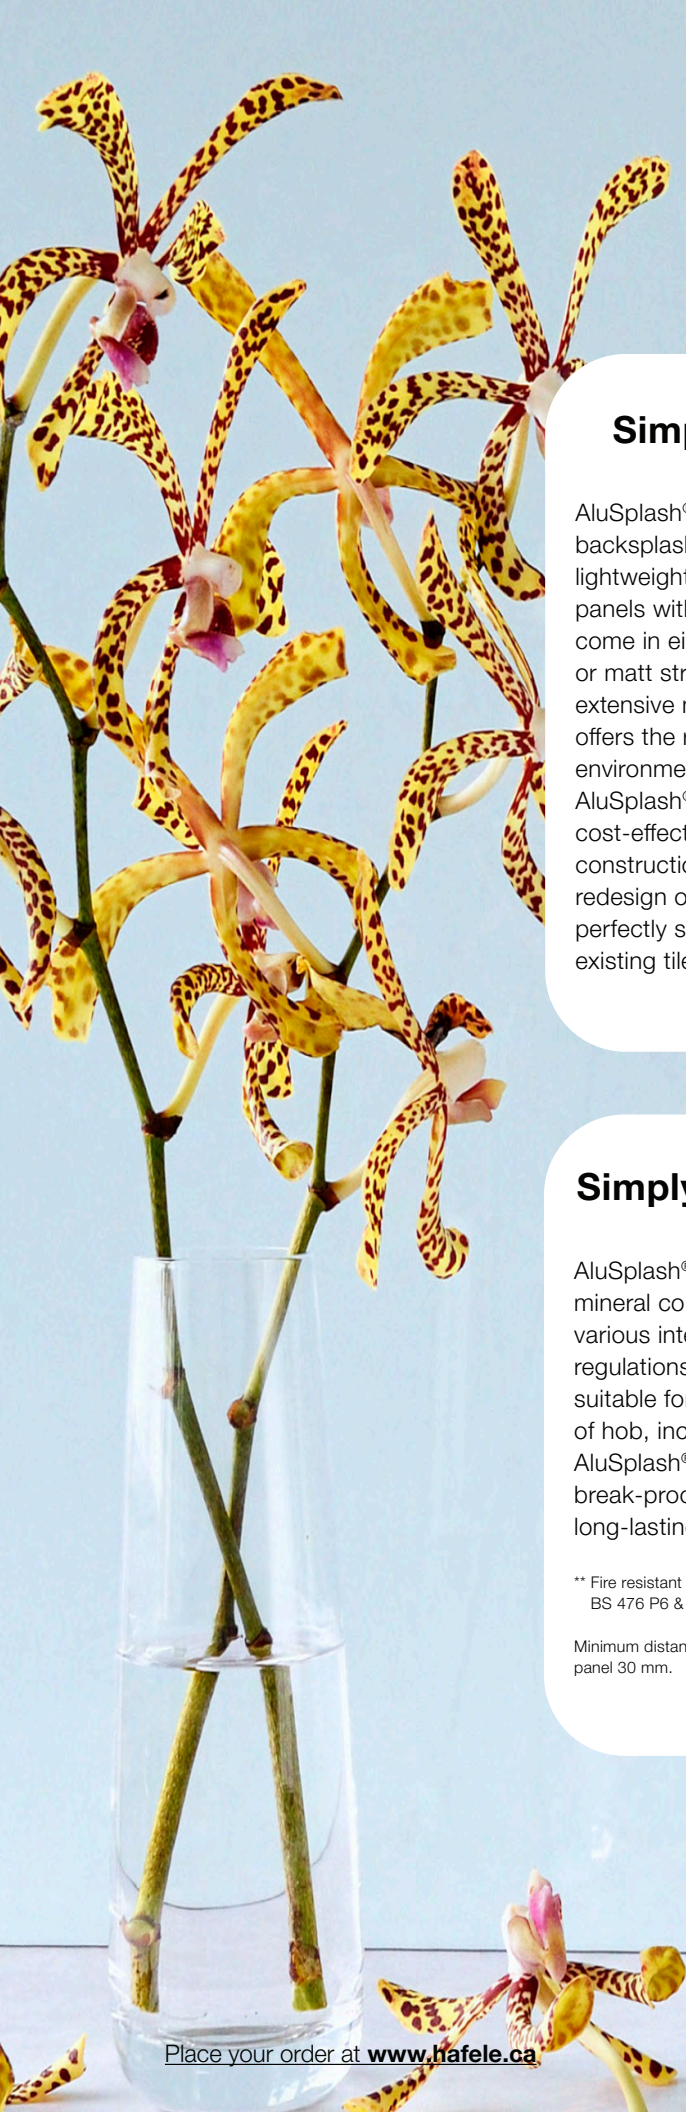

Simply Beautiful.

AluSplash® is the innovative backsplash for the kitchen. The lightweight aluminum-based panels with easy-care surface come in either a shiny glass look or matt structured finish. The extensive modern colour range offers the right nuance for every environment.

AluSplash® is the elegant and cost-effective solution for new construction, renovation or redesign of kitchens and is also perfectly suited for covering existing tiled walls.

Simply Fast.

AluSplash® can be attached to the wall in no time at all and be easily processed: The 4 mm thin panels are easy to cut to size and can be mounted 90° around edges for seamless fitting. Cut-outs for sockets or other devices can be easily made with conventional tools. To attach the panels use a combination of mirror tape and silicone as well as aluminum profiles. The panels can be joined almost seamlessly using a joining strip.*

* Installation material sold separately.

Simply Safe.

AluSplash® has a fire-resistant mineral core that complies with various international fire protection regulations** and is therefore suitable for use behind any type of hob, including gas cooktops. AluSplash® panels are also break-proof, durable and long-lasting.

** Fire resistant material according to EN-13501, BS 476 P6 & P7, ASTM E-84, AS/NZ 1530.3.

Minimum distance from cooktop to AluSplash® panel 30 mm.

Simply Clean.

The seamless and smooth surface of AluSplash® prevents dirt accumulation and is therefore hygienic, easy to clean and quick to maintain.

For cleaning and protecting the shiny AluSplash® panels, Vuplex® Spray is suitable. It protects the panel surface from grease splashes and dirt deposits, so that cleaning with just a damp cloth is sufficient. Scratching or abrasive cleaning agents or utensils should be avoided.

The Elegance Collection

The Elegance Collection adds a sophisticated touch to any modern interior, blending advanced functionality with elevated style.

Each panel subtly incorporates intricate metallic flakes that reflect beautifully in the light, displaying a truly luxurious finish. This collection has been made with style in mind, without compromising on quality or design. AluSplash® can be easily combined with sleek surfaces, modern cabinetry and appliances to create a seamlessly luxe finish to all contemporary interior spaces.

A modern alternative to glass, acrylic and tiled backsplashes; the high-gloss Elegance collection is thoroughly versatile and eco-friendly.

Our colour palette has been created to include beautiful earthy and neutral colours, as well as vibrant and bold accent hues to suit any interior colour scheme.

Matte Textured Surface

The Elements Collection

This exclusive collection embodies the true essence of the four main elements found in nature: Earth, Water, Air and Fire to create matt textured backsplash panels.

Influenced by the textures of these elements, we have developed a coarse finish that forms the surface of the "Elements" collection to represent the perfectly imperfect, natural and beautiful textures found in nature.

In addition to the plain colours, we have designed marble and concrete finishes in-line with the collection. We have carefully curated the colour palette for this collection to bring each of these four elements into your interior space by selecting a range of colours that best represent the individual elements.

Profiles

We offer an exclusive range of aluminum edge finishing profiles in silver or anthracite dark grey that helps to cover exposed edges for a sleek, clean look. All profiles come with pre-applied double sided 3M tape. AluSplash® profiles add an additional 1 mm thickness at the back of the installed panels, so that the sealant can flow and dry correctly for a strong bond to the wall.
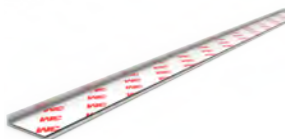

Edge Profile

> Our sleek and minimalistic L shaped profile helps to cover the exposed edges of an AluSplash® backsplash to give your kitchen a perfect and professional looking finish.

Colour	Dimension mm	Item No.
Silver	3050	564.53.919
Anthracite	3050	564.53.319

Worktop Profile

> This profile has been specially designed to be used between the worktop and an AluSplash® backsplash. The profile is curved, making cleaning easier and keeping your kitchen worktop hygienic.

Colour	Dimension mm	Item No.
Silver	3050	564.53.599
Anthracite	3050	564.53.539

Joining Strip Profile

> The joining strip is used on the back of the panel to connect two panels seamlessly together.

AluSplash® by Häfele
Care and Maintenance

AluSplash® panels are vigorously tested for various aspects of functionality and durability. However, like most wall surfaces it is imperative that the panel be cared for and maintained correctly to ensure it retains its aesthetic look, colour, gloss and surface finish.

DO		DO NOT	
✔	The panel surface must be cleaned regularly with lukewarm water and micro fibre cloth only.	✘	Metal pot scrubbing pads or any other abrasive cleaners should not be used on the panel surface. Avoid cleaning the surface with kitchen paper rolls as they can also cause micro scratching.
✔	For added protection and to enhance the life of your AluSplash® panels, we highly recommend protecting the panel surface with Vuplex for High Gloss finishes and Matte Maxx for matte finishes to prevent the panel surface from any micro-scratching or buildup of dirt and grime.	✘	Do not use acidic, caustic or abrasive cleaning detergents or materials to clean the panel surface.
✔	For stubborn stains you may use a mild detergent to gently clean the panel surface with a micro fibre cloth only.	✘	Detergents with bleach or home remedy solutions such as baking soda, or other stain removing gels, powders, liquids or materials should not be used on the panel surface.

MAXIMIZING DESIGN

Meet the H23 collection, with exclusive Häfele designs from several decades of history – from Bauhaus to mid-century to post-modernism. The licensed reproductions are based on original patterns and drawings by Jens Risom, Bodil Kjaer, Paul McCobb, August Schatte, Nanna Ditzel, Michael Graves, Dieter Rams and Jasper Morrison.

With a nod to these internationally renowned designers, this collection serves as the finishing touch that elevates aesthetic appeal, adding a touch of style and personality to the overall space. Beyond its visual impact, well-chosen hardware enhances the functionality of cabinets and drawers.

LIGHTING

09

MAXIMIZING LIGHTING

Loox Lighting is an innovative and versatile LED solution for both residential and commercial applications.

This product range operates at 24 volts and includes new accessories such as wireless wall switches, wireless controls and motion detectors. Discover a range of LED light strips, profiles, switches, distributors, adaptors, remote controls and drivers.

Light is plannable.

The need to observe only a few planning steps structures and simplifies the planning of lighting in furniture.
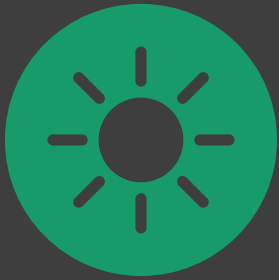

Illuminating.

At the start of the development process, determine the lighting purposes of the furniture (multiple choices possible)

> Task light for pleasant and safe working
> Ambient light for highlighting or staging
> Accent light for storage spaces or paths

Also take into account the overall brightness of the room and the finishes to be illuminated: Sufficiently bright ceiling lighting or sunlight makes the orientation light unnecessary during the day, but at night it may be very pleasant if the ceiling lighting does not need to be used and a few furniture pieces provide some orientation light.
For confidence in the planning process, test lighting and finishes or use bright lighting with dimmers to achieve a balance of incident light and reflection.

The form factor of a light (linear, point) and the number used affects the planarity of the illumination. Light colour, installation type, position on the cabinet, and alignment are further criteria to select the perfect light.
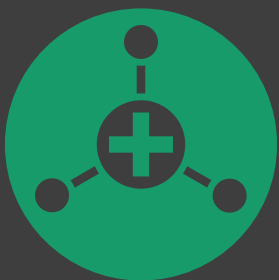

Extending.

Häfele Loox5 drivers supply not only lights, but also charging stations (inductive and USB), audio systems, as well as electrically operated flap fittings, sliding doors, or TV lifts. Take advantage of the potential of Häfele Loox5. Create furniture that can do more than simply look good.

Switching.

Plan switch requirements and switch positions. Simple mechanical switches or convenient sensors and dimmers can be grouped together by means of multi-driver or multi-switch boxes to conveniently operate lights from a single location or from different locations.

Networking.

The Häfele Connect Mesh 6-way distributor is the central element for controlling monochrome lights, multi-white lights, or RGB lights individually or jointly. 6-way distributors can be networked. They can be controlled by remote control, wall-mounted push button, or app.

Distributing.

Plan the concealed cable routing and provide holes, grooves, or panels. An extensive range of extension leads and distributors facilitates suitable cabling of your project.
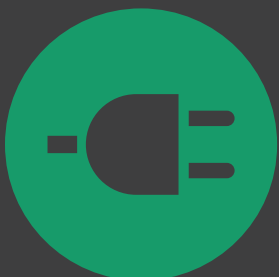

Supplying.

Add up the wattage of all lights and other devices. If necessary, take into account possible later expansions and select a driver of the appropriate performance class. Lights of the same voltage type or current may be connected to a common driver. Converters are also available and are necessary if lights with different voltage types and currents will share a driver.

Choose a distributor for your current needs (with or without switching function or with Häfele Connect Mesh).

FLAP FITTINGS

10

MAXIMIZING UPPER CABINETS

Häfele offers a range of innovative and stylish flap fittings for upper cabinets to enhance the functionality of kitchen cabinets.

Browse our curated product range of Häfele Free Space, Häfele Free Fold, Häfele Free Swing and Häfele Free Up - all designed to maximize space.

Häfele Free Space
Overview

> For flaps made from wood or with aluminum frame
> Hinge-less stay flap fitting for more free room in all respects
> Extremely powerful: suitable for the majority of the most common flap sizes and weights
> Highly compact: a minimal footprint provides more storage space in furniture
> Gentle running characteristics for easy operation
> Quick and simple installation
> Four standard colours and product options for handle-free applications

Overview

> For one-piece flaps made from wood, glass or with aluminium frame
> Ideal for cabinets with front panels above
> Hardly any space required in the room towards the front
> Creates practical "niches" in tall cabinets, e.g. for electrical equipment
> Cabinet contents are extremely easy to access
> Excellent side stability
> Minimum opening resistance, multi-position stop function and integrated soft opening and soft closing mechanisms for extremely pleasant operating feeling
> Separate models are available for applications without handle
> Rational and quick installation thanks to pins, pre-mounted Euro screws and quick fixing system of the front panel and cross bar
> Stylish and compact design

> Adjustments: Height adjustment: ±1.5 mm, Side adjustment: ±1.5 mm, Tilting angle: ±1.5°, holding power

Material: Fitting: plastic, steel; Cover Cap: plastic; Finish: nickel-plated
